Feyzo

London, United Kingdom
hey@feyzo.net · feyzo.net · github.com/feyzo

WHAT I DO

- **Build a whole product as one person.** Web or mobile end to end, and most of a backend or API project, from product and design requirements through to data flow and database architecture.
- **Get the UX right.** I work with designers and product owners so that engineering isn't the limit on what they can ask for.
- **Make it fast.** Performance across the whole stack: browser, transport, server and database, rather than one layer at a time.
- **Answer the risky questions early.** I phase work around prototypes that settle the unknowns, instead of a build that runs for months before anyone can judge it.
- **Put AI into production.** Agentic workflows with evals, verification and cost control, built to run unattended rather than to demo.

Core stack: TypeScript · Node.js · React · React Native · Next.js · GraphQL · Postgres · AWS

EXPERIENCE

Phantom, Senior Software Engineer Jun 2025 – May 2026
Prediction markets end to end, trading, mobile

Portfolio Projector, Co-founder & CTO 2025 – Aug 2026
Wealth management platform bridging traditional investments and real estate

Coinbase, Staff Engineer (IC6) Jan 2022 – May 2025
Coinbase Prime and Prime Admin UIs · platform team lead

AccessFintech, Solution Architect 2018 – 2022
Contract · post-trade data and workflow platform for banks

Fathom London, Senior UI Engineer 2016 – 2018
Contract · product studio doing financial client work end to end

Morgan Stanley, Senior Full Stack Developer 2016
Contract

GigBug, Senior Full Stack Developer 2015
App for discovering gigs and following bands around you

Jacobean R&D, Full Stack JavaScript Developer 2014 – 2015
State machine compiler and serializer

Kagen Air, Full Stack JavaScript Developer 2014
Health app linking weather and environment to allergy symptoms

McCann Erickson, Creative Technologist 2012 – 2014
Advertising · campaign builds including an interactive Coca-Cola factory tour

4129Grey, Software Developer 2009 – 2012
Advertising · industrial robots for Renault · Microsoft games for 12 countries and 50M users

Argeon R&D, Intern 2009
Fleet management and GPS tracking
